## **Agriculture and Fishery Worksheet Notes**

### **Data Sources**

Sources of data for the agriculture and fishery worksheet are publications of the U.S. Department of Agriculture, Agricultural Yearbook (AY), Agricultural Statistics (AS), and Foreign Agricultural Trade of the United States (FATUS); the U.S. Department of Commerce, Bureau of the Census, Statistical Abstract of the United States (SAUS); the Department of Commerce, National Oceanic and Atmospheric Administration, Fisheries of the United States (FUS) and its predecessor publications listed in the paragraph and reference sections below; and Resources for the Future, Natural Resource Commodities—A Century of Statistics (NRC). Data in all categories are apparent consumption data. The years of publication and corresponding years of data coverage are listed in the References section below.

### **Cotton**

For the years 1900–65, cotton apparent consumption data are recorded from NRC. For the years 1966–2000, cotton apparent consumption data are calculated from AS statistics using the formula:

$$\text{APPARENT CONSUMPTION} = \text{PRODUCTION} + \text{IMPORTS} - \text{EXPORTS} \pm \text{STOCK CHANGES.}$$

### **Cottonseed**

Cottonseed used to produce oil for nonfood purposes is estimated to be 10% of cottonseed sales to oil mills. For the years 1900–65, cottonseed data are recorded from NRC. For the years 1966–2000, cottonseed data are recorded from AS.

### **Fishery**

Fishery data are for fish oils and flake used for nonfood purposes. For the years 1900–04, data are recorded from U.S. Commission of Fish and Fisheries, 1900–04, Commissioner's report. For the years 1905–17, data are recorded from U.S. Bureau of Fisheries, 1905–17, Commissioner's report and special papers. For the years 1918–38, data are recorded from U.S. Department of Commerce, Bureau of Fisheries, 1918–38, Fishery statistics of the United States. For the years 1939–55, data are recorded from U.S. Department of the Interior, Bureau of Fisheries and Wildlife, 1939–55, Fishery statistics of the United States. For the years 1956–2000, data are recorded from FUS.

### **Flaxseed**

For the years 1900–48, flaxseed weights are estimated and recorded from dollar values of flaxseed produced as reported in NRC. For the years 1949–2000, flaxseed statistics are recorded from AS as flaxseed disappearance (consumption).

### **Leather Hides**

Leather apparent consumption statistics are for calves, cattle, and sheep hides. For the years 1900–35, leather apparent consumption statistics are calculated from statistics in AY. For the years 1935–2000, leather apparent consumption statistics are calculated from statistics in AS. Leather apparent consumption is calculated with the formula:

$$\text{APPARENT CONSUMPTION} = \text{PRODUCTION} + \text{IMPORTS} - \text{EXPORTS.}$$

### **Mohair**

Mohair production is assumed to equal mohair apparent consumption. For the years 1900–35, mohair production statistics are recorded from AY. For the years 1936–2000, mohair production statistics are recorded from AS.

### **Raw Silk and Waste**

For the years 1900–60, raw silk and waste apparent consumption is estimated from NRC silk import statistics. For the years 1961–2000, raw silk and waste apparent consumption is estimated from FATUS import statistics for raw silk and waste.

### **Rubber**

Rubber imports are assumed to equal rubber apparent consumption. For the years 1900–73, rubber apparent consumption is estimated with NRC rubber import statistics. For the years 1973–93, rubber apparent consumption is estimated from SAUS import statistics of crude natural rubber. For the years 1993–2000, rubber apparent consumption is estimated from FATUS import statistics for crude rubber and allied gums available.

### **Tobacco**

Tobacco apparent consumption is assumed to equal the consumption of all tobacco products to include: chewing tobacco, cigarettes, cigars, smoking tobacco, and snuff. For the years 1900–65, tobacco consumption statistics are recorded from NRC. For the years 1966–2000, tobacco consumption statistics are recorded from AS.

### **Wool**

For the years 1900–1935, wool apparent consumption statistics were recorded from AY. For the years 1936–2000, wool apparent consumption statistics were recorded from AS statistics for total raw wool supply (clean).

## **Total Agriculture and Fishery**

Total agriculture and fishery statistics are the sum of the specific apparent consumptions for the categories described above. Total apparent consumption data are rounded to the nearest ten thousandth because of the level of accuracy in cottonseed statistics.
